

MERN Stack Introduction Notes

Topics Covered:

- What is MERN Stack
- MongoDB Basics
- Express.js Introduction
- React.js Components
- Node.js Runtime Environment
- REST API Concepts
- Project Folder Structure
- VS Code Setup
- Installing Dependencies
- Creating First MERN Application

MERN Stack:

MERN stands for MongoDB, Express.js, React.js, and Node.js. It is one of the most popular full stack JavaScript technologies used for building modern web applications.

MongoDB:

MongoDB is a NoSQL database used to store application data in JSON-like format.

Express.js:

Express.js is a backend framework used with Node.js to build APIs and servers.

React.js:

React.js is a frontend library used to build fast and responsive user interfaces.

Node.js:

Node.js allows JavaScript to run outside the browser and helps create backend applications.

Conclusion:

By learning MERN Stack, students can build complete full stack applications including LMS platforms, e-commerce websites, dashboards, and more.
